

## Veterinary cardiology position on the French Riviera

AZURVET is a veterinary specialist referral center located in Nice, on the French Riviera. We have been providing referral-only specialist activity since 2007, moving to a brand new, custom-built multidisciplinary hospital in 2020. We offer referral-based activity in small animal surgery, internal medicine, cardiology, neurology, dentistry, diagnostic imaging and clinical pathology.

**We are recruiting a full-time cardiologist to join our team of veterinary specialists.**

Applicants should be EBVS specialists in Cardiology, holding a Diploma of the ECVIM-CA (Cardiology) or ACVIM (Cardiology), or have completed a residency training program making them eligible to EBVS specialist status.

Experience in cardiac interventional radiology would be preferred although further training in this field could be envisaged.

Your schedule will be based on a 4-day week with no on-call duties. AZURVET is not operating out of hours for emergencies but the site offers 24/7 care to in-patients.

Fluent French would be preferred, although we will consider applications from candidates willing to learn to speak French. Italian and English speakers are very welcome, to deal with a very cosmopolitan clientele.

The current clinic is in a new purpose-built, 2000m<sup>2</sup> facility. Our team currently includes 23 veterinarians, including 13 diplomates (3 ECVDI, 1 ECVS / am-ECVDI, 2 ECVS-SA, 2 ECVIM-SA, 2 ECVN, 1 ACVIM-Neurology, 1 EVDC, 1 ECVCP), 1 ECVCP eligible clinical pathologist and 3 residents (2 ECVDI and 1 ECVIM-CA).

We have an on-site laboratory providing services in clinical biology, hematology, cytology and bacteriology.

Current equipment includes an interventional suite equipped with a digital GE C-arm, 80 slices helical CT scanner (with power injector), 1.5 T MRI unit, 1 CBCT, 3 ultrasound scanners, Digital Radiography, PACS, Digital endoscopy systems etc.

We have a high case-load in cardiology, currently supported by the radiologists with the off-site assistance of a board certified cardiologist (DipECVIM-Cardiol).

The hospital is located in Saint Laurent du Var, near Nice on the French Riviera, 40 km from the Italian border. Nice is a dynamic city with 1.2 million people living on the coast from the Italian border to Cannes, the sea at our feet and high mountains in our backyard. You can expect a true southern French way of life and a consistently sunny weather. Social life is plentiful and many outdoor activities are on offer, from sea to mountains – ski resorts less than one hour away.

Nice International Airport offers daily flights to many destinations.
