

The MERMOSZVET veterinary clinic is located in Lyon and receives its patients in the context of general consultations, specialised consultations, referrals and veterinary emergencies. Our activities consist of internal medicine, imaging, ophthalmology, surgery, cardiology, dermatology, dentistry, emergency and intensive care for dogs and cats. NACs are managed by a full-fledged service.

Our team is composed of 24 veterinarians and 25 ASVs.

The clinic's medicine and imaging team is composed of veterinarians graduated from CEAV of internal medicine or with solid experience in internal medicine and imaging, as well as general veterinarians, involved in modern preventive medicine and offering nutrition, behaviour and physiotherapy services.

One of the pillars of the clinic is its emergency service, with a dedicated team (emergency reception 24/7, presence of ASV at night and weekends) and an adapted hospitalisation service.

The clinic moved in 2020 to spacious premises with a technical platform with many equipment (colour Doppler ultrasound, scanner, digital radiology, endoscopy, operating microscope, laser). We have the ambition to provide effective care and to be a reference clinic in internal medicine, it is to accompany us in this process that we are looking for a veterinarian specialised in internal medicine!

### **Missions and responsibilities**

- Management of internal cases of the clinic and referred to internal medicine (we will not ask you to manage general medicine cases!)
- Management of hospitalised animals in medicine
- Management of complementary medical examinations including endoscopy and FAST ultrasounds (imaging is carried out by the imaging service)
- Writing reports, communication with referring veterinarians
- Participation in the continuous training of the team (medical rounds, club newspaper, conferences) and interns (clinic with 2 to 4 veterinarians each year).

## **Why join us?**

Lyon is ideally located, not far from the mountains and about 2 hours from the sea. It is a dynamic city, with important local gastronomy and many festivities. If you want to continue training and developing your skills, we will allow you to have projects together. If you want to work in an already very autonomous team and integrate into the MermozVet team.

Is benevolence a value that resembles you? Well-being at work is one of our priorities, we will be committed to taking care of you.

Are the quality of care and expertise important to you? Perfect! Quality is paramount for each of us. MermozVet is an innovative company that aims to develop best practises.

## **Profile**

Resident in internal medicine (possibility to free up time to take the exam) or already a graduate. You want to evolve in a multidisciplinary clinic that will allow you to fully express your skills. Do you have a strong team spirit and like to exchange around cases? Join us!

## **Remuneration and conditions**

Remuneration to be negotiated according to the profile and working time.

CDI in day package (complete or reduced) to be filled as soon as possible.

## **Convinced?**
