### **Role Summary**

The Small Animal Internal Medicine role offers an exciting opportunity to join a collaborative and supportive team at the Roseworthy Veterinary Hospital, contributing to high-quality clinical care, education, and research in small animal medicine. The position involves a mix of clinical, teaching, research, and administrative responsibilities tailored to the candidate's strengths, including primary case management and the re-establishment of the internal medicine specialty service. Teaching responsibilities focus on the 2nd and clinical years of the DVM curriculum, with additional opportunities to mentor new graduates, veterinary nurses, and students. This role provides a dynamic environment to advance knowledge, support lifelong learning, and help shape the future of veterinary internal medicine and education.

At Adelaide University, we create the opportunities you need to achieve your ambitions – because when you thrive, we thrive.

We are transforming education for contemporary learners and global citizens. Building on a proud legacy and shaped by bold ambition, it's a place of excellence and equity, where our vibrant community of staff are united by our purpose to inspire Australia's future change-makers and create a better tomorrow.

### **Work that matters**

In this role, you will play a key part in advancing veterinary education, clinical excellence and research in small animal internal medicine. Your work will directly influence student learning, professional training and high-quality veterinary care for the wider community.
