

**Job Description: Dutch/Flemish and French-Speaking Veterinarian with a strong interest in Companion Animal Internal Medicine**

**Position: Part-time (0.5 FTE) Associate for Antech Laboratory Belgium – Telephone Consultation Advice Service (Dutch and French)**

**To reinforce our team in Medical Excellence and expand our services in Flanders and the Netherlands, we are seeking a Dutch or Flemish-speaking Veterinarian with a strong interest in Internal Medicine for companion animals to join our team, initially on a part time basis (0.5 FTE). Being a former resident or a specialist (ECVIM-CA or ACVIM) would be an asset.**

Antech, a part of Mars Science & Diagnostics within Mars Petcare, has established itself as a leader in clinical biology in the French-speaking region of Belgium, with over 30 years of experience. Since 2020, our laboratory has expanded its offerings to include histopathology and cytology departments, creating a national centre of expertise that provides comprehensive clinical biology and pathology services, unique to Wallonia.

Our team comprises 13 veterinarians, with two specialists certified by European boards.

We currently serve Belgium, the northern part of France, and Luxembourg delivering high-level expertise in clinical biology to support veterinarians in their diagnostic processes. Our laboratory is connected to a network of specialist veterinarians at both national and international levels, facilitating ongoing exchanges of scientific updates.

Joining Antech means embracing a commitment to professionalism and quality within an innovative and evolving group.

**Role Responsibilities:**

- Provision of expert medical advice and support to veterinary practitioners
- Validation, communication and interpretation of test results to Belgian (French or Flemish speaking) and Dutch customers
- Examination of smears (blood, urine, hair, ...). Training can be provided if required
- Support in translating/writing scientific comments or documents
- Participation in marketing events (mostly in Flanders or the Netherlands)

**Candidate Profile:**

- Possess a Master's degree in Veterinary Medicine.
- Strong interest in Internal Medicine for Companion animals. Being a specialist or past resident (board eligible) in Internal Medicine for companion animals (ECVIM-CA or ACVIM) is an asset.
- Registered with the Belgian veterinary college (Ordre des Médecins Vétérinaires - Conseil Régional Francophone or Orde der Dierenartsen - Nederlandstalige Gewestelijke Raad).
- Team player with strong interpersonal skills.
- Customer-oriented with a commitment to high-quality standards.
- Proficiency in French and Dutch is mandatory; knowledge of English is an asset.

**Our Offer:**

- Engagement as a part time employee/associate (0.5 full-time equivalent)
- Schedule: Monday to Saturday.
- On site work (Headquarters located in Suarlée, Namur, Belgium)
